

SqCategory
Class

Fields

Methods

- GetAllCategories(session As ISessionDao) As IList(Of Category)
- GetCategoryByDescription(session As ISessionDao, description As String) As IList(Of Category)
- GetCategoryById(session As ISessionDao, id As Integer) As IList(Of Category)
- New()
- Remove(session As ISessionDao, category As Category)
- Save(session As ISessionDao, category As Category)

SqProjectProposalRevision
Class

Fields

Methods

- GetAllRevisionsByProjectProposalNameId(session As ISessionDao, projectProposalNameId As Integer, properties As IList(Of String)) As IList(Of ProjectProposalRevision)
- GetProjectProposalRevisionById(session As ISessionDao, id As Integer) As IList(Of ProjectProposalRevision)
- New()
- Save(session As ISessionDao, projectProposalRevision As ProjectProposalRevision) As ProjectProposalRevision

SqSubCategory
Class

Fields

Methods

- GetCategoryByCategoryId(session As ISessionDao, categoryId As Integer) As IList(Of SubCategory)
- GetSubCategoryByDescription(session As ISessionDao, description As String) As IList(Of SubCategory)
- GetSubCategoryById(session As ISessionDao, id As Integer) As IList(Of SubCategory)
- New()
- Remove(session As ISessionDao, subCategory As SubCategory)
- Save(session As ISessionDao, subCategory As SubCategory)

SqProjectProposalName
Class

Fields

Methods

- GetAllProjectProposalNames(session As ISessionDao) As IList(Of ProjectProposalName)
- New()

SqFactory
Class

Fields

Properties

- Category As ICategoryDao
- Employee As IEmployeeDao
- FormDescription As IFormDescriptionDao
- Instance As SqFactory
- Privileges As IPrivileges
- ProjectProposalName As IProjectProposalNameDao
- ProjectProposalRevision As IProjectProposalRevisionDao
- RevisionStatus As IRevisionStatusDao
- Role As IRoleDao
- SubCategory As ISubCategoryDao

Methods

- CreateSession() As ISessionDao
- New()

SqEmployee
Class

Fields

Methods

- GetAllEmployees(session As ISessionDao) As IList(Of Employee)
- GetEmployeeOrEmployeeId(session As ISessionDao, employeeId As String) As IList(Of Employee)
- New()

SqRevisionStatus
Class

Fields

Methods

- GetAllRevisionStatuses(session As ISessionDao) As IList(Of RevisionStatus)
- GetRevisionStatusById(session As ISessionDao, id As Integer) As IList(Of RevisionStatus)
- GetRevisionStatusByName(session As ISessionDao, name As String) As IList(Of RevisionStatus)
- New()

SqConfiguration
Class

Fields

Properties

- SessionFactory As ISessionFactory

Methods

- ConfigureHibernate(configurationFileName As String)
- New(environmentConfiguration As String)

SqFormDescription
Class

Fields

Methods

- GetAllFormDescriptions(session As ISessionDao) As IList(Of FormDescription)
- GetFormDescriptionByFormName(session As ISessionDao, formName As String) As IList(Of FormDescription)
- GetFormDescriptionById(session As ISessionDao, id As Integer) As IList(Of FormDescription)
- New()
- Remove(session As ISessionDao, formDescription As FormDescription)
- Save(session As ISessionDao, formDescription As FormDescription)

GenericNhbdao(Of T)
Generic Class

Methods

- CreateCriteria(session As ISession, criterions As ICriterion(), orders As Order(), projection As IProjection()) As ICriteria
- Delete(session As ISession, obj As T)
- GetAll(session As ISession) As IList(Of T)
- GetForCriteria(session As ISession, criterions As ICriterion(), orders As Order()) As IList(Of T)
- GetForCriteriaAndProjection(session As ISession, criterions As ICriterion(), orders As Order(), projection As IProjection()) As IList(Of T)
- Merge(session As ISession, obj As T) As T
- SaveOrUpdate(session As ISession, obj As T) As T
- ThrowNHibernateException(message As String, ex As Exception)

SqRole
Class

Fields

Methods

- GetAllRoles(session As ISessionDao) As IList(Of Role)
- GetRoleById(session As ISessionDao, id As Integer) As IList(Of Role)
- GetRoleByName(session As ISessionDao, name As String) As IList(Of Role)
- New()
- Remove(session As ISessionDao, role As Role)
- Save(session As ISessionDao, role As Role)

SqSession
Class

Fields

Properties

- Session As ISession

Methods

- CancelAndClose()
- Close()
- CommitAndClose()
- New(sessionFactory As ISessionFactory)

RunningEnvironment
Class

Fields

Properties

- GetEnvironment As String
- Instance As RunningEnvironment
- SetEnvironment As String

NHibernateException
Class

Exception

Methods

- New()
- New(info As SerializationInfo, context As StreamingContext)
- New(message As String)
- New(message As String, inner As Exception)

SqPrivileges
Class

Fields

Methods

- GetPrivilegesByEmployeeId(session As ISessionDao, employeeId As String) As IList(Of Privileges)
- New()
