

# odslist List the contents of all sheets of an OpenDocument Spreadsheet

---

doc generated from the script with [gendoc](#)

ruby script, version=1.01

## Synopsis

words [options] files

`-s, --sheets=list` list the sheets in the comma separated `list` counting the first sheet as 1.  
`-n, --newline=string` Sets the string which replaces newlines in multiline cells.  
`-v, --verbose` print header for each sheet  
`-V, --version` print version and exit  
`-h, --help` print this help and exit

## Description

**odslist** lists the contents of an OpenDocument Spreadsheet as tab-separated, unquoted cells. With the `--verbose` option, a header line is printed above each sheet, containing the number of the sheet and its name.
