

CS4985

Final Exam

Grading Rubric

Please note that the pages created in the previous exercises will be graded such that each is worth 1 point and will be graded on an 'all-or-nothing' basis – so if there's one piece of one of the previous pages that you just cannot get working, you'll only lose 1 point if you still cannot get it right.

Also know that the code style and organization is important. If there are any problems listed by ReSharper (except for the known thing with BIND) then no Style points will be awarded. Be sure to get this correct before submitting.

16/16 "Old" Functionality

8/8 Project 01

1/1 Customer class

1/1 CustomerList class

1/1 Feedback class

1/1 CustomerList.aspx

1/1 ContactList.aspx
