Chapter 1

Example chapter 1

Random text.

1.1 Example section 1

More random text, and aligning stuff with links to the equations. Not that important.

$$x^2 + 6x + 9 = (x+3)(x+3) \tag{1.1}$$
$$= (x+3)^2 \tag{1.2}$$

Without links.

$$x^2 + 6x + 9 = (x+3)(x+3)$$
$$= (x+3)^2$$

And finally, equations:

$$x^2 + 6x + 9 = (x+3)(x+3) = (x+3)^2 \tag{1.3}$$

and the reference 1.3.

1.1.1 Example subsection 1

Even more random text, with an itemization.

- First item.

- Second item.

- etc.

1.1.2 Example subsection 2

More random text, with an enumeration.

1. First item.

2. Second item.

3. etc.

1.2 Example section 2

Even more random text. With a reference to [1], in the bibliography.
