

guessencoding guess a file's encoding

doc generated from the script with [guessencoding](#)

bash script, version=1.02

Synopsis

guessencoding [-v] [file]

Options

-h, --help	print short help and exit
-H, --Help	print full documentation and exit
-V, --version	print version and exit
-v, --verbose	run verbosely
-n, --noname	don't report filenames

Description

guessencoding reports the encoding determined by *usrbin/file*, but reports ASCII if all bytes are in the range 0-127. The **-v** option reports the non-ASCII characters found
