

the following labels are almost all wrong

see frame 2 (should be frame 7)

see frame 7 (should be frame 7)

see frame 1 (should be frame 6)

see frame 1 (should be frame 6)

They all work if you delete all sections and subsections from the file.

frame 2

frame 3

frame 4

frame 5

frame 5bis

frame 6

this frame has labels but no overlays.

I cant seem to find a way to get the correct frame number out of the label!

It is quite interesting to see how the internal value of the current label

2

changes while viewing this frame's slides. Note how the first value shown is also the value given to the label "lastframe" (and is wrong, since this is frame 7)

It is quite interesting to see how the internal value of the current label

7

changes while viewing this frame's slides. Note how the first value shown is also the value given to the label "lastframe" (and is wrong, since this is frame 7)

1

It is quite interesting to see how the internal value of the current label

7

changes while viewing this frame's slides. Note how the first value shown is also the value given to the label "lastframe" (and is wrong, since this is frame 7)

1

the label inserted in overlay 2 (or following) is the only one that works

2
